A. Installation of Pipe Fittings:

1. Tighten fitting by hand, then turn it 2-3 turns with a wrench until it reaches the desired torque listed. If the fittings is not pre-coated with sealant, or is used and the sealant is not in good condition, apply Teflon sealant tape to the threads.

Recommendation of Torque for Tightening Fittings		
Fitting Thread Size	Torque, lb-ft	Torque, kgf/cm
10-32, M5 –M6	1.0 – 1.5	14 – 21
NPT1/8, R1/8	5 – 6.5	70 – 90
NPT1/4, R1/4	8.5 – 10	120 – 140
NPT3/8, R3/8	16 – 17.5	220 – 240
NPT1/2, R1/2	20 – 21.5	280 – 300

B. Installation of Tubing into Fitting:

1. Slowly push a clean and perpendicularly cut tube into the fitting until it comes to a dead stop.
2. Gently pull the tubing back until the Grip Ring or Collet of the fitting grips onto the tubing and has a good seal.
3. Use Polyethylene, Polypropylene, Polyurethane, or Nylon tubing designed for instant fittings.

C. Removal of Tubing from Fitting:

1. Push in evenly on the two long, oval sides of the Release Button.
2. Pull out the tube while depressing the Release Button.
3. To reuse the tubing, cut off the lodged portion of the previously used tubing in an even and perpendicular fashion.

D. Recommended Tubing Material, Size, and Hardness Requirements:

Tubing Material	Specified Size	Hardness (Durometer)
Polyurethane	+/- 0.006" (+/-0.15 mm)	Shore A 85 or higher
Polyethylene	+/- 0.004" (+/-0.1 mm)	Shore D 44—D75
Polypropylene	+/- 0.004" (+/-0.1 mm)	Shore D 44—D75
Nylon	+/- 0.004" (+/-0.1 mm)	Shore D 44—D75
Pre-grooved Metal Tubing	+/- 0.004" (+/-0.1 mm)	

E. Specifications, Materials of Construction, and Schematic of Typical Construction:

Specifications	
Operating Pressure Range	0 - 180 PSI (0 - 1200 kpa)
Vacuum	0 - 29.5" Hg (750 mm Hg)
Operating Temperature	32 - 140°F (0 - 60 °C)
Recommended Tubing Material	Polyurethane, Nylon, Polyethylene, Polypropylene
Metal Body	Brass, Nickel Plated
Plastic Body	PBT (Polybutylene terephthalate)
Release Button	POM (Poly oxy methylene copolymer)
Grip Ring or Collet	300 series Stainless Steel
O-ring	NBR (Buna-N)
Thread Sealant	Teflon
Service	FOR AIR ONLY

Composite Angle Flow Control Air Valves Flow Rate

Special Features:

- Complete rotation of the valve body around the bolt allows for optimum positioning of tubing
- Compact size provides space saving installations
- Special adjustment needle design allows large adjustment with high precision
- Adjustment needles and banjo bodies are retained, preventing accidental loss of needle or lock nut.

Stainless Steel Push-In Fittings Specifications

A. Installation of Pipe Fittings:

Tighten fitting by hand, then turn it 2-3 turns with a wrench until it reaches the desired torque listed. If the fittings is not pre-coated with sealant, or is used and the sealant is not in good condition, apply Teflon sealant tape to the threads.

Recommendation of Torque for Tightening Fittings		
Fitting Thread Size	Torque, lb-ft	Torque, kgf/cm
10-32, M5 – M6	1.0 – 1.5	14 – 21
NPT1/8, R1/8	5 – 6.5	70 – 90
NPT1/4, R1/4	8.5 – 10	120 – 140
NPT3/8, R3/8	16 – 17.5	220 – 240
NPT1/2, R1/2	20 – 21.5	280 – 300

B. Installation of Tubing into Fitting:

1. Slowly push a clean and perpendicularly cut tube into the fitting until it comes to a dead stop.
2. Gently pull the tubing back until the Grip Ring or Collet of the fitting grips onto the tubing and has a good seal.
3. Use Polyethylene, Polypropylene, Polyurethane, or Nylon tubing designed for instant fittings.
4. Hard metal tubing can be used for all metal Stainless Steel if the tubing is pre-grooved.

C. Removal of Tubing from Fitting:

1. Push in evenly on the Release Button.
2. Pull out the tube while depressing the Release Button.
3. To reuse the tubing, cut off the lodged portion of the previously used tubing in an even and perpendicular fashion.

D. Recommended Tubing Material, Size, and Hardness Requirements:

Tubing Material	Specified Size	Hardness (Durometer)
Polyurethane	+/- 0.006" (+/-0.15 mm)	Shore A 85 or higher
Polyethylene	+/- 0.004" (+/-0.1 mm)	Shore D 44—D75
Polypropylene	+/- 0.004" (+/-0.1 mm)	Shore D 44—D75
Nylon	+/- 0.004" (+/-0.1 mm)	Shore D 44—D75
Pre-grooved Metal Tubing	+/- 0.004" (+/-0.1 mm)	

E. Specifications, Materials of Construction, and Schematics of Typical Construction:

	Stainless Steel Fittings
Operating Pressure Range	0 - 250 PSI (0 - 1650 kpa)
Vacuum	0 - 30" Hg (0 - 760 mm Hg)
Operating Temperature	5 - 230°F (-15 to 110°C)
Recommended Tubing Material	Polyurethane, Nylon, Polyethylene, Polypropylene, and Hard metal tubing (tubing must be pre-grooved)
Metal Body	T316 Stainless Steel
Plastic Body	None
Release Button	300 series Stainless Steel
Grip Ring or Collet	300 series Stainless Steel
O-ring	VITON
Thread Sealant	None
Service	Air, Liquid
Sterilization Temperature	Up to 280°F (138°C)

Compression Fittings Specifications

Specifications	
Operating Temperature	-425 to 600 °F
Material of Construction	316 stainless steel
Compatible with	Swagelok®, Parker A-Lok, Let-Lock, Yor-Lok
Service	Air, Water, Steam, Oil, Gasoline, Natural Gas, most solvents and acids that are compatible with 316 SS

Pressure		
Tube Size (OD)		Maximum Pressure (PSI @72 °F)*
1/16"		10000
1/8"	2 mm	8800
3/16"	4 mm	5500
1/4"	6 mm	4200
5/16"	8 mm	3300
3/8"	10 mm	2800
1/2"	12 mm	2500
5/8"	16 mm	2300
3/4"	18 mm	2100
1"	20 mm	1900

* Maximum pressures are based on Type 304 and 316 annealed stainless steel welded tubing made to ASTM A213, A249, or A269 standards.

Barb Compression Fittings Specifications

Specifications	
Operating Temperature	-60 to 200°F (when used with Nylon Tubing) -350 to 500°F (when used with Teflon Tubing)
Material of Construction	316 stainless steel
Service	Air, Water, Steam, Oil, Gasoline, Natural Gas, most solvents and acids that are compatible with 316 stainless steel and the tubing material used
Maximum Pressure	800PSI @72 °F*

* Maximum pressures are based on high pressure Teflon or Nylon tubing.

V3C Valve Specifications	
Sanitary Stainless Steel Ball Valve:	These valves are made with precision machined Teflon seats for use in sanitary applications. They are three piece designs and have four bolts that permit quick and easy access to service the valve without disrupting the pipeline connections.
Maximum Operating Pressure:	1/2" to 2" 1000 PSI @ 100°F WOG* 2 1/2" to 4" 800 PSI @ 100°F WOG*
Temperature Range:	-60 to 450°F
Full Port	
End Connections:	Clamp End
Mounting Options:	Padlocking device and actuator mounting bracket.

2KS & 2KD Specifications & Features	
Operating Pressure	29" Hg Vacuum to 240 PSI (0-1.6MPa)
Temperature Range	-5 to 356°F (-20 to 180°C)
Ambient Temperature	-5 to 40°F (-20 to 60°C)
Maximum Viscosity	600 mm ² /s (600 centistokes)
Installation Orientation	Any orientation
Pilot Controlling Medium	Air, Inert Gas
Pilot Pressure Range	65-120 PSI
Wetted Surfaces	300 Series Stainless Steel and PTFE
Service Medium	Air, Gas, Liquid, Oil, Steam, Water, Vacuum

Materials of Construction	
Valve Body	316 Stainless Steel
Valve Stem	316 Stainless Steel
Seat Seals	PTFE
Stem Seals	PTFE (Spring loaded self-adjusting for long service life)
Actuator Body	Stainless Steel CF8 (Designed for harsh applications)
Piston	HPb59-1
Piston Ring V-Seals	NBR / FKM (Viton)
Spring	Stainless Steel
Indicative Stem	HPb59-1
Top Cap	Polycarbonate

5010-XX														

These FRL components are of modular design with joiner clamps. The joiner clamps allow easy connection and disconnection of FRL components for simple installation and maintenance.

Filter Regulator Lubricator Selection:

1. Determine flow rate requirements.
2. Determine required set point pressure and allowable pressure drop.
3. Locate the FRL graph with set point pressure that provides the flow rate with acceptable pressure drop.

Air Filter Flow Charts

Filter Selection:

1. Determine flow rate requirements.
2. Determine required set point pressure and allowable pressure drop.
3. Locate the FRL graph with set point pressure that provides the flow rate with acceptable pressure drop.

AF1000 Series Filter
Flow Rate VS Pressure Drop
@ 30, 60, 90 PSI Supply Pressure

AF2000 Series Filter
Flow Rate VS Pressure Drop
@ 30, 60, 90 PSI Supply Pressure

AF3000 Series Filter
Flow Rate VS Pressure Drop
@ 30, 60, 90 PSI Supply Pressure

AF4000 Series Filter
Flow Rate VS Pressure Drop
@ 30, 60, 90 PSI Supply Pressure

Air Regulator Flow Charts

Regulator Selection:

1. Determine flow rate requirements.
2. Determine required set point pressure and allowable pressure drop.
3. Locate the FRL graph with set point pressure that provides the flow rate with acceptable pressure drop.

AR1000 Series Pressure Regulator
Flow Rate VS Set Point Pressure
Supply Pressure 100 PSI

AR2000 Series Pressure Regulator
Flow Rate VS Set Point Pressure
Supply Pressure 100 PSI

AR3000 Series Pressure Regulator
Flow Rate VS Set Point Pressure
Supply Pressure 100 PSI

AR4000 Series Pressure Regulator
Flow Rate VS Set Point Pressure
Supply Pressure 100 PSI

Air Filter-Regulator Flow Charts

Filter Regulator Selection:

1. Determine flow rate requirements.
2. Determine required set point pressure and allowable pressure drop.
3. Locate the FRL graph with set point pressure that provides the flow rate with acceptable pressure drop.

A W1000 Series Filter Regulator
Flow Rate VS Set Point Pressure
Supply Pressure 100 PSI

AW2000 Series Filter Regulator
Flow Rate VS Set Point Pressure
Supply Pressure 100 PSI

AW3000 Series Filter Regulator
Flow Rate VS Set Point Pressure
Supply Pressure 100 PSI

AW4000 Series Filter Regulator
Flow Rate VS Set Point Pressure
Supply Pressure 100 PSI

Filter Regulator Lubricator Selection:

1. Determine flow rate requirements.
2. Determine required set point pressure and allowable pressure drop.
3. Locate the FRL graph with set point pressure that provides the flow rate with acceptable pressure drop.

AC5000 Series Filter Regulator Lubricator
Flow Rate VS Set Point Pressure
Supply Pressure 100 PSI

AF4000-06 Series Filter
Flow Rate VS Pressure Drop
@ 30, 60, 90 PSI Supply Pressure

AR5000 Series Pressure Regulator
Flow Rate VS Set Point Pressure
Supply Pressure 100 PSI

AW5000 Series Filter Regulator
Flow Rate VS Set Point Pressure
Supply Pressure 100 PSI

STC Solenoid Valve Numbering System

Ordering Part No. =
(e.g., 4V110-1/8-1-D)

4V	1	10	1/8		1	D
Model—Spool Valves	Valve Size	Solenoid/Position	Port Size (NPT)	Mounting	Voltage	Electrical Terminal
3 Way Air Pilot Valve	3A	1 Solenoid 2 Position	10-32	Standard	12 VDC	DIN
3 Way Solenoid Valve	3V	2 Solenoid 2 Position	1/8	(leave blank)	24 VDC	Grommet
4 Way Air Pilot Valve	4A	2 Solenoid 3 Position (Closed Center)	1/4	Namur Mounting / Actuator Mounting	24 VAC	Explosion Proof
4 Way Solenoid Valve	4V	2 Solenoid 3 Position (Exhausted Center)	3/8		110 VAC	UL Listed Coil
		2 Solenoid 3 Position (Pressure Center)	1/2		220 VAC (50/60Hz)	

STC Manifold Numbering System

Ordering Part No. =
(e.g., 4V-200M-6)

4V-200M	6
Model—Manifold	Options
Manifold for 3V100 Series Valves	No. of Stations (Includes Gasket and Mounting Hardware)
Manifold for 3V200 Series Valves	2
Manifold for 3V300 Series Valves	4
Manifold for 3V400 Series Valves	6
Manifold for 4V100 Series Valves	8
Manifold for 4V200 Series Valves	16
Manifold for 4V300 Series Valves	Blank Plate (with 2 Short Screws)
Manifold for 4V400 Series Valves	Gasket
	KIT includes Blanking Plate, Gasket, & Mounting Hardware

Technical drawing showing three types of valves (Ball Valve, Plug Valve, Gate Valve) with dimensions and labels.

Labels and Dimensions:

- 3-1/4" NPT
- 2-ø4.3
- 21
- 17.7
- 4
- 67.7
- 23
- 16
- 76
- 35

Technical drawings of the 1000 Series connector showing front, side, and detail views with dimensions:

- PP (Front View):** Dimensions include a top flange width of 17, a main body diameter of 41, and a total height of 46.
- PPL (Front View):** Dimensions include a top flange width of 22, a main body diameter of 46, and a total height of 46.
- TB (Side View):** Dimensions include a top flange width of 34, a main body diameter of 6.4, and a total height of 6.4.
- PB (Front View):** Dimensions include a top flange width of 37.5, a main body diameter of 58, and a total height of 58.
- EB (Front View):** Dimensions include a top flange width of 37, a main body diameter of 61, and a total height of 61.
- R (Detail View):** Shows a detail of the connector's internal structure with dimensions 42, 5.5, and 2.5.

PANEL MOUNT HOLE SIZE 1 3/16" (30 MM)

Technical drawing of the 3000 Series 1/2" (3000 Series 1/2") showing three views: front, side, and top. The drawing includes dimensions and specifications for the component.

Front View Dimensions:

- Overall length: 98
- Distance from left face to center of first hole: 63.5
- Distance between centers of first and second holes: 32
- Distance between centers of second and third holes: 18
- Distance from center of third hole to right face: 12.5
- Outer diameter of the main body: $\varnothing 32$

Side View Dimensions:

- Overall height: 35
- Distance from top face to center of first hole: 24
- Distance from center of first hole to center of second hole: 20

Top View Dimensions:

- Distance from left face to center of first hole: 21

Specifications:

- Thread specification for the main body: 2-G1/8"
- Thread specification for the side port: M14X1
- Thread specification for the top port: 3- 1/4" NPT
- Material specification: 3- $\varnothing 4.3$

SU/SC Cylinder Technical Data									
Bore (mm)	32	40	50	63	80	100	125	160	200
Motion Pattern	Double Action								
Working Medium	Air								
Fixed Type	Basic / LB / FA / CA / CB / TC / TC-M Type								
Operating Pressure	14 to 130 PSI (1.0~9.0bar)								
Ensured Pressure Resistance	195 PSI (13.5bar)								
Operating Temperature	0 to 70 °C								
Operating Speed	50 ~ 800mm/s								
Cushioning Length	20				26				45
Port Size	G 1/8"	G 1/4"		G 3/8"		G 1/2"			G 3/4"

Terms and Conditions

By purchasing from SIZTO TECH CORPORATION (STC), you agree to these TERMS AND CONDITIONS. No other terms shall apply except as agreed in writing signed by us. We reserve the right to correct typographic errors and reject orders.

SHIPMENTS:

All shipments are F.O.B. 892 Commercial Street, Palo Alto, CA 94303, USA. Most orders are shipped via UPS Standard Ground unless instructions accompany order. Outside the UPS zones, shipment will be made Best Way. The responsibility for goods delay, lost or damaged in transit rests with the carrier and purchaser. Purchaser may purchase shipping insurance to cover lost or damaged products caused by shipping.

RETURN OF MERCHANDISE:

No merchandise is accepted for return 30 days after delivery date. No credit allowed on merchandise shipped as ordered and returned without obtaining an authorization number IN ADVANCE. A 20% restocking charge applies to all returns, and transportation charges must be fully prepaid. We will pay **ground** transportation charges on re-sent or returned merchandise due to STC's error.

Shortages & Mis-Shipments: Any shortages or mis-shipment must be reported within 15 days.

CANCELLATION POLICY:

Blanket orders can be canceled 90 days before scheduled ship date. There will be a 10% charge if a blanket order is cancel within 90 days of scheduled ship date, and a 20% charge if cancel within 60 days. Regular order for non-custom parts can be canceled any time before the order is shipped. For custom parts, a 30% down payment is required either at the time of order or 90 days prior to scheduled ship date, whichever comes later.

Remittances should be sent to:

Sizto Tech Corporation, 892 Commercial Street, Palo Alto, CA 94303, USA.

Credit Card Payments: Visa, MasterCard, Discover, or American Express Accepted.

International Customers: Advance Payment Required via Bank Wire, Cashier's Check or Approved Credit Card.

Credit Application: To establish a net 30 day account, please mail or fax three trade references with complete mailing addresses and account numbers.

LIMITED WARRANTY – IMPORTANT NOTICE TO PURCHASER:

Sizto Tech Corporation (STC) only warrants this product to be free from defects in materials and workmanship at the time of shipment. This limited warranty expires one year after delivery to the end-user. STC's entire obligation to the Purchaser for breach of this limited warranty shall be limited to replacement of the defective product or refund of the original purchase price of this product, at STC's option. Purchaser has thirty (30) days to return the goods after STC has agreed to accept the return. All freight charges on returned material shall be paid by the Purchaser. STC's limited warranty shall not apply, however, to the product that have been subjected to misuse, alteration, accident or negligence during handling or storage.

DISCLAIMER OF IMPLIED WARRANTIES:

All implied warranties, which may arise by implication of law or application of course of dealing or usage of trade, including, but not limited to, implied warranties of merchantability or fitness for a particular purpose are expressly excluded. There are no warranties, which extend beyond the description of the faced hereof. The end user is solely responsible for the suitability and fitness of this product selected for a particular application.

OBLIGATIONS

You warrant, represent and agree: (1) to comply with all laws; (2) that our sale and shipment of the product will not, by export thereof, your legal status or otherwise, cause us to violate any law; and (3) to indemnify us against any losses from a failure by you or a third party to comply with law or these terms and conditions, or from use of the product.

SAFETY WARNING

Failure or improper selection or improper use of the components and products described herein or related items can cause death, personal injury and/or property damage. This document and other related information from STC provide products options for further investigation by users having the technical expertise. It is important that you analyze all aspects of your application and review the information concerning the component or product in the current catalog. Due to the variety of operation conditions and applications for these components or products, the user, through his own analysis and testing, is solely responsible for making the final selection, installation and maintenance of the products and assuring that all performance, safety and warning requirements of the application are met. All products set-ups and maintenance require the supervision of a qualified individual who is familiar with installation, inspection and testing through training or experience.

IMPORTANT NOTICE:

The products described herein, including without limitation, product features, specifications, design, availability and pricing, are subject to change without notice. We continuously improve the products, and we reserve the right to change specifications without incurring any obligation to incorporate new factors in equipment previously sold.
