

## STC Timer for Air Compressor: 2W200C-T

The STC Model 2W200C-T solid state timer features DIN quick disconnect electrical connections, is specifically designed for condensation removal, and has standard time ranges of 0.5 to 10 seconds “on” and 0.5 to 45 minutes “off.”

The timer fits between a DIN 43650 cord set and a STC solenoid valve. One LED on the timer indicates when power is attached or removed; and a second LED indicates when the valve is draining. The 2W040 2-way, 2-position normally closed stainless steel and brass STC solenoid valve offers a high life cycle and low maintenance, and is available in 1/4” and 3/8” NPT and can accommodate pressures up to 250 PSI. The size of the timer is 74x43x21(mm), and the size of the two adjustment knobs is: 6mm dia. X 6mm height
